A Few of the Glorious Colors in the New Hybrid Delphiniums

There are of course, in addition to these, the usual deep Delphinium blues and dark blue-purples, pure snow-white, etc. The illustrations are greatly reduced and it is nothing unusual for 2 feet of flowers to appear on a stalk 4 to 5 feet high with individual florets 2 to 3 inches across. They are gorgeous in the garden and there is nothing finer for cut flowers. Strong flowering size plants, 75c each; 3 for \$1.75; 6 for \$2.75; 12 for \$4.50; 100 for \$30.00.

ROBERT WAYMAN, BAYSIDE, LONG ISLAND, NEW YORK

White Birch

Nothing is more delightful or more striking in the landscape, or in the garden, winter or summer, than these ornamental trees, with their snow-white bark. For best effect they should be planted in groups of several trees a few feet apart. I have some fine strong shapely 4- to 5-foot trees at \$1.50 each; 3 for \$3.75; 6 for \$6.00; 12 for \$10.00; 100 for \$60.00.

"Golden Gleam" Collection of Daffodils

Choice Narcissus and Jonquils Also Included

This heralds of spring time will take care of themselves anywhere, in the fields, as shown in the illustration at the left, or in the garden. They will delight you with their early spring bloom, besides furnish an abundance of cut flowers for the house. Plant them between the perennials in the border and they will give early beauty by being in full bloom before any of the perennials put in their appearance. When once planted they can be left undisturbed for years and will increase from year to year without any care. 20 bulbs, \$1.50; 30 bulbs, \$2.00; 50 bulbs, \$3.00; 100 bulbs, \$5.00; 1,000 bulbs, \$40.00.

Pink Shasta Daisy, "Clara Curtis"

The illustration below is just one plant. This illustration is greatly reduced, as the plant is nearly 2 feet across and the flowers are as much larger in proportion, being about 3 inches in diameter. The flowers are always produced in the greatest profusion during August, September and October, just as shown in the illustration. It is the hardiest of all Shasta Daisies and one of the hardiest of all plants grown. It has grown outdoors unprotected without injury at my nursery in the highlands of New Jersey, near one of the highest points in the state, where winter temperatures reach 20 below zero. It is a gorgeous sight in the garden and superb as cut flowers. 50c each; 3 for \$1.25; 6 for \$2.00; 12 for \$3.50; 25 for \$6.00; 100 for \$22.50.

PINK SHASTA DAISY "CLARA CURTIS"
